

PATIENT OUTCOME REPORTS

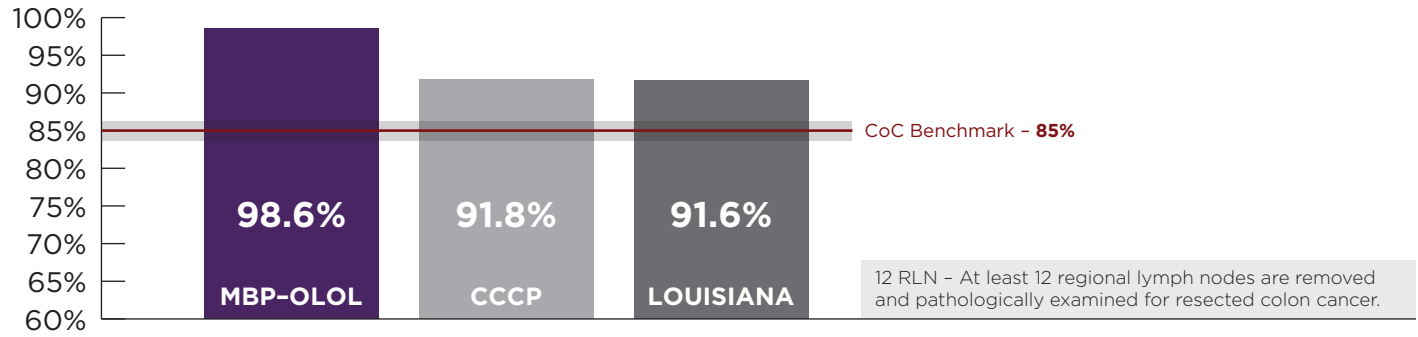

The Cancer Program Practice Profile Reports (CP3R) allow Mary Bird Perkins - Our Lady of the Lake Cancer Center to assess compliance and compare our performance rate with other cancer programs approved through the American College of Surgeons Commission on Cancer (CoC) Approvals Program. Compliance is demonstrated by the estimated performance rate being at or above the CoC benchmark, or by falling within the 95% Confidence Interval (CI). The Cancer Center met or exceeded all CoC benchmarks for all measures for the current reporting period.
