

You don't have to accept
"This is just the way it is."

Let the healing begin.

You can do something about it

Erectile dysfunction (ED) is more common than you may think, but it doesn't have to be your new normal.

Introducing UroGold by SoftWave TRT – a non-invasive, non-pharma solution, geared towards providing sustainable relief from ED and enhancing your overall sexual wellness.

Fostering spontaneous intimacy

It's time to leave behind the discomfort and awkwardness of penis pumps and unnecessary medications. Embrace a holistic, on-demand solution that integrates seamlessly into your lifestyle, fostering spontaneity, not anxiety.

UroGold is a product of SoftWave TRT, LLC (SWTRT). SWTRT is a medical technology company that is developing advanced solutions for better patient healing specializing in shockwave therapy. Headquartered in Alpharetta, GA, SWTRT is committed to the scientific advancement of tissue healing and regeneration as well as the development of the most effective innovations to improve the quality of lives globally.

Discover Freedom with SoftWave's UroGold

Your Sustainable Solution for Men's Sexual Health

A natural alternative to medications and surgery.
An option that heals.

SoftWave's UroGold stimulates your body's own healing capabilities

Unlike traditional treatments such as medicines, injections, or even penile prostheses, SoftWave's UroGold employs patented advanced technology to naturally improve erectile function. It boosts your body's blood supply and activates connective tissue to optimize performance, without the need for constant planning or fear of side effects that come with conventional treatments, like PDE5i medications.

What is SoftWave UroGold?

EFFECTIVE

SoftWave's UroGold is a superior electrohydraulic Li-ESWT that has been proven to be effective and safe for patients suffering from men's sexual health conditions. The patented applicator generates energy wide and deep for predictable patient outcomes.

Non-invasive

No anesthesia or numbing creams needed

No side effects

Same day procedure

Long lasting

TRUSTED

Used at leading national and international research and medical centers

FDA 510(k) cleared for:

- Activation of connective tissue
- Improved blood supply

RESEARCHED

A preponderance of evidence continues to be published in academic journals worldwide documenting the efficacy and safety using Li-ESWT for vasculogenic ED

SoftWave Therapy

What to expect

- **Consultation:** A detailed discussion about your symptoms, medical history, and overall health.
- **Treatment:** Non-invasive, generally painless
- **Convenience:** Quick sessions of 15-20 minutes spread over a few weeks based on your specific condition.
- **Minimal Side Effects:** Safe and well-tolerated procedure
- **Follow-Ups:** Regular appointments to monitor your progress and adjust your treatment plan as needed.

Take control early

Even if your ED is mild, ignoring these early signs could progress to moderate or chronic conditions. With SoftWave's UroGold, you can take control early, securing a healthier, more satisfying sexual life.

Embrace the power of natural, effective intervention

Say goodbye to discomfort and awkwardness brought by injections, penis pumps, and implants. Welcome to a new era of sexual wellness with SoftWave TRT— where your health is enhanced, your convenience respected, and your spontaneity celebrated.

Changing lives one pulse at a time

I was surprised this was pain-free and I had surprising results.

Assessing the 2 treatments I've had, the biggest difference I've noticed is that for roughly 48 hours after the treatment I seem to experience more sensitivity and I can get erections with more ease.
